Form PCT/ISA/210 (first sheet) (July 1998)

International application No. PCT/US 01/15580

Box I	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)
This inte	mational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
ı. 🔲	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
2. 🔲	Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
з. 🔲	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II	Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)
This inte	ernational Searching Authority found multiple inventions in this international application, as follows:
	see additional sheet
•	
1. X	As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
э. 🔲	As only some of the required additional search fees were timely paid by the applicant, this international Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4.	No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remari	The additional search fees were accompanied by the applicant's protest.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-37, 49-58

Elastic laminate material having different zones of elastic tension across a width of the material obtained by using filaments having different basis weights for the different zones of elastic tension, one processes for making the same and garments comprising this product.

2. Claims: 38-48

Second method for producing the product of claim 1.

3. Claims: 59-117

elastic laminate materials having different zones of elastic tension across a width of the material obtained by using filaments of diverse elastomeric polymers for the different zones of elastic tension, processes for making the same and garments commissing this product.

4. Claims: 118-124, 131, 143, 144, 146-161, 164-166

Laminate comprising strand of an elastomeric material applied to a first major surface of an elastomeric film and related to the nature of the polymers used, garments incorporating this product and method for making it.

5. Claims: 125-130, 145, 162, 163, 167

Laminate comprising strand of an elastomeric material applied to a first major surface of an elastomeric film and comprising a further facing sheet and method for making it.

6. Claims: 132, 133

Laminate comprising strand of an elastomeric material applied to a first major surface of an elastomeric film and related to different portions of the elastomeric film exhibiting different amounts of elastic tension.

7. Claims: 134-142

Laminate comprising strand of an elastomeric material applied to a first major surface of an elastomeric film and related to the presence of multiple elastomeric strands on the elastomeric film surface.
